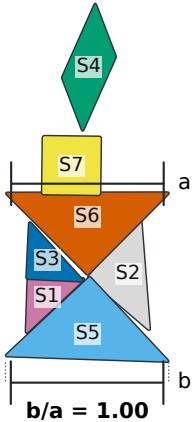
A geometric check of the accepted candle configurations

Target silhouette and three first-person VR cases · analytical top projections

a Target

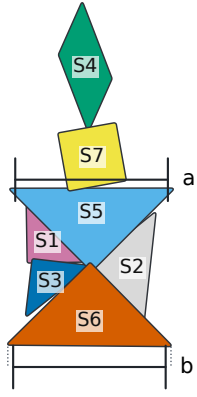
b/a = 1.00

b G03 · 145 s



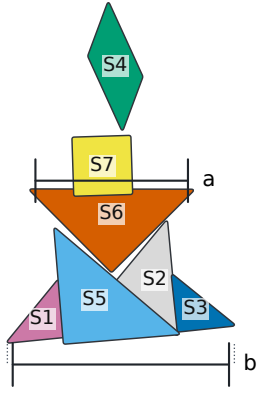
b/a = 1.00

c G04 · 115 s



b/a = 1.00

d G06 · 214 s



b/a = 1.39

a: longest chord of the upper large triangle. b: lower-piece extent projected along that chord.

Whole layouts are rigidly aligned to a; all three cases retain the same world scale.

Target scaled uniformly for comparison. This ratio measures one geometric relation, not total shape error.
